

**DON-NAVY-2019-009000**

I am demanding that the statements made by the sailors in the 2017 & 2018 Command Climate Survey be unredacted. These statements prove that HSC-28 knew about the bullying, hazing, harassment, abusive power and leadership among many other detrimental things being done to my son and other sailors in this command. This command drove my son, Brandon Caserta to die by suicide and they are stating they did not know of the abuse that was going on there. They found one guy guilty who was kicked off of deployment (which is supposed to be a promotion) due to his illegal antics and actions. He was put back in charge only to continue his hateful, deceitful, despicable ways. He was even removed from the command after he made derogatory comments about Brandon and the incident two days after his death. I do not know anyone in that command so there is absolutely no way I could figure out who wrote what. I deserve to read and know what these statements say because these statements will tell me the chain of command did not care one bit about Brandon or the other sailor's welfare and wellbeing. Our men and women in the US Navy deserve to be better treated. We need to get commanders who care about their sailors because this chain of command (Whitmer, Prouty, Tokarski, Spence, Lerette, Delasandro, Hennard, Brose and more) certainly did not care about Brandon. Brandon deserves justice. I want these statements unredacted and sent to me.
